

From fully stocked to fully shopped, customers shop from a convenient pick point, while display appearance remains constant with no employee intervention

Use the E-Z Shop™ Leveler as a stand-alone display or in-line with shelves for high volume sales items or important seasonal promotions. Self-leveling spring mechanism automatically raises platform as goods are removed to keep display items in shoppers' line of sight even as the display is picked. This convenient product positioning makes transferring items to carts easier for all shoppers.

To improve aesthetics and increase merchandising effectiveness, the unit can be wrapped with decorative cardboard, or a roller shade with the store logo or product messaging can be easily attached.

E-Z Shop Leveler comes mounted on a galvanized steel pallet for easy relocation with a hand pallet truck.

Features and Benefits

- Continuously repositions the remaining goods on a pallet at shopping cart height as items are removed by shoppers
- Time-tested spring adjustment mechanism requires no power
- Use on the sales floor or outside in lawn and garden centers
- Display appearance is much neater than pallets on floor—requires no re-stacking or other employee intervention
- Ideal for beverages, pet food, grain, seed and other bulk items
- Platform accommodates most sizes and pallets
- Works with pallet loads up to 2,500 lbs.
